Project Details

Eclipse Technoconsulting Global Pvt. Ltd.   [26th Dec, 2017 to 8th Nov, 2019]

➢ **Project 1**
Project Name: CryptoPod Website

Technology: Python, Django

Role: Backend Developer

Team size: 4   [2 Developer, 1 PM, 1 Tester]

Duration: 4 Months [Completed]

Description: This is an interactive platform where you can discuss the latest crypto trends and monitor all **cryptocurrency markets streaming in real time**. We show live streaming prices, charts and analysis from all of the top crypto. This made for giving update to their user about every detail on Crypto Coin. Here user can ask any question and make comment as well as react like dislike to the others questions & comments. From this site user can get all type of crypto related news, all ICO details. According to the user have chosen plan he will be able to access more features in this website. Admin can control everything from Admin panel. User can give feedback to Admin. Admin can edit anything except user data.

- ➤ **Project 2**
  Project Name: StartWrite Desktop [INDO-USA Collaboration]

  Technology: Python, Tkinter, Matplotlib, Canvas

  Role: Developer

  Team size: 4   [2 Developer, 1 PM, 1 Tester]

  Duration: 8 Months [Completed]

  Description: StartWriteIndia is one of the best kid's handwriting software. In this project we have work on **Fontography**. We are fetching data from .TTF file which was made by Our Company. You can create practice sheets that focus students and children's specific needs and interests. After create practice sheet you need to download and print out sheets. With this application we can teach our kid how to write Cursive hand writing, where is staring point of every letter, by applying stoke arrow we can make them understand easily How to write every letter. We can add image on the sheet to make kid understand how to identify real life object. Actually we can create colorful amazing handwriting practice sheet for kid with this application.

- ➤ **Project 3**
  Project Name: Video Price Signs

  Technology: Python, Django, Restfull API

  Role: Developer

  Team size: 4

  Duration: 1years [Completed]

  Description: It is a website which containing thousand of Videos which was developed by this Website owner. All this video has different category Admin can create category and upload video on this different category. Admin will upload this Video on his **Vimeo** account and shared this link and immediately this video will show into website. There is Different Plan for the User According to this plan User will get that type of facility. If User has a paid account in this VPS Website he can use the **Embedded link** of any video in his/her own website until the plan is expired. User can request to Admin for Customaries any video from his/her account but in this case user have to pay some amount of money. Now this whole website should be like **an API / Plug-ins format** so that we paid user can use this API/Plug-ins in WordPress, shopify, Wix platform as a template.

Nat IT Solved Pvt. Ltd. [11th Nov, 2019 to 22th Feb,2020]

- ➤ **Project 1**
  Project Name: Knovva Learning Application

  Technology: Python, Django
